## Summary

---

Junior emphasizes software engineer with 1.5+ years of experience in Full Stack development using **Java, Spring Boot, Microservices, Angular, and React**. Experienced in building secure **REST APIs** with **JWT** and **Spring Security**, working with **SQL databases**, Dockerized deployments, and monitoring tools. Passionate about building scalable and high-performance applications.

## Education

---

**Bachelor of Technology in Computer Science and Engineering** **2021 – 2024**  
*JNTUH University, India*

## Technical Skills

---

**Backend:** Java | Spring | Spring Boot | Spring Security | Microservices | Hibernate | Spring Data JPA | JWT | Apache Kafka | Swagger

**Frontend:** Angular | React.js | JavaScript | TypeScript | HTML5 | CSS3 | Bootstrap | Tailwind CSS | Material UI

**Databases & DevOps:** MySQL | PostgreSQL | SQL | Docker

**Build & Deployment:** Node.js | NPM | Vite | Vercel

**Tools & Monitoring:** Git | GitHub | Postman | Insomnia | Grafana | Prometheus | SonarLint

## Work Experience

---

**Varsity Edification Management Pvt. Ltd.** **2024 – Present**  
*Full Stack Developer* *Hyderabad, India*

- Developed and maintained **microservices-based backend systems** using **Spring Boot**, handling high-volume data with scalable architecture.
- Implemented secure authentication and authorization using **JWT** and **Spring Security**.
- Built dynamic and responsive frontends using **Angular, Material UI**, and **Tailwind CSS**.
- Optimized **MySQL** and **PostgreSQL** queries, improving performance by **25%**.
- Containerized applications using **Docker** and collaborated with DevOps teams for deployments.
- Implemented application monitoring using **Grafana** and **Prometheus** to reduce downtime.

## Projects

---

**E-Commerce Web Application** Live Demo | GitHub

- Developed a full-stack e-commerce application using **Spring Boot** and **Angular** with authentication, product catalog, and order management.
- Integrated **JWT authentication** and **MySQL** to support 1000+ users.

**Spring Boot REST API** GitHub

- Built secure REST APIs using **Spring Boot, JWT**, and documented using **Swagger**.
- Implemented validation, exception handling, and unit testing for production readiness.

**Monkey Type Clone** Live Demo | GitHub

- Developed a typing speed test application using **React.js** with real-time scoring and accuracy tracking.
- Designed a responsive UI for cross-device compatibility.

**Tic Tac Toe Game** Live Demo | GitHub

- Built a classic game using **HTML, CSS, and JavaScript** with win/draw detection.
- Optimized UI for desktop and mobile gameplay.
